-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. patent application 2004/0034605 granted to Khaishgi et al.

Regarding claim 1, Khaishgi meets the claimed limitations as follows:

“A method for providing a user with confirmation of the origin and identity of a Web site comprising the steps of:

registering a Web site with an assuring 3rd party;

saving said registration on a registration server;” see paragraph [0028].

“entering in a database an Internet domain for said Web site;

cross-referencing said Web site's Internet domain to the origin and identity information;” see paragraph [0025].

“retrieving said Web site's Internet domain with an Internet browser;

browsing to the Web site for the Internet domain;

sending a query from a client application tool via a secure SSL connection to said registration server and passing it said Web site's Internet domain name;  
determining if said Web site's Internet domain has been registered;  
and returning the associated registration data to the client application tool for display.”  
see paragraphs [0003], [0018], [0021], [0022], [0024], [0029], [0031], [0032]; and figures 2, 5 and 6.

Regarding claim 2, Khaishgi meets the claimed limitations as follows:

“A method for providing a user with confirmation of the origin and identity of a Web site comprising the steps of:

registering a Web site with an assuring 3rd party;

saving said registration on a registration server;” see paragraph [0028].

entering in a database an Internet domain for said Web site;

cross-referencing said Web site's Internet domain to the origin and identity information;”

see paragraph [0025].

retrieving said Web site's Internet domain with an Internet browser;

browsing to the Web site and receiving an HTML image tag, calling a program via a secure SSL connection on said registration server and passing it said Web site's Internet domain name;

determining if said Web site's Internet domain has been registered;

and returning an image to the browser for display containing registration data from the registration server associated with the domain name, together with date-and-time information and code that prevents the dynamic icon from being copied.” see

paragraphs [0003], [0018], [0021], [0022], [0024], [0029], [0031], [0032]; and figures 2, 5 and 6.

Regarding claim 3, Khaishgi meets the claimed limitations as follows:

"A system for providing a user with confirmation of the origin and identity of a Web site comprising:

a component for registering a Web site with an assuring 3rd party;

a component for saving said registration on a registration server;" see paragraph [0028].

a component for entering in a database an Internet domain for said Web site;

a component for cross-referencing said Web site's Internet domain to the origin and identity information;" see paragraph [0025].

a component for retrieving said Web site's Internet domain with an Internet browser;

a component for browsing to the Web site for the Internet domain;

a component for sending a query from a client application tool via a secure SSL connection to said registration server and passing it said Web site's Internet domain name;

a component for determining if said Web site's Internet domain has been registered;

and a component for returning the associated registration data to the client application tool for display." see paragraphs [0003], [0018], [0021], [0022], [0024], [0029], [0031], [0032]; and figures 2, 5 and 6.

Regarding claim 4, Khaishgi meets the claimed limitations as follows:

"A system for providing a user with confirmation of the origin and identity of a Web site comprising the steps of:

a component for registering a Web site with an assuring 3rd party;  
a component for saving said registration on a registration server;" see paragraph [0028].  
a component for entering in a database an Internet domain for said Web site;  
a component for cross-referencing said Web site's Internet domain to the origin and identity information;" see paragraph [0025].  
a component for retrieving said Web site's Internet domain with an Internet browser;  
a component for browsing to the Web site and receiving an HTML image tag;  
a component for calling a program via a secure SSL connection on said registration server and passing it said Web site's Internet domain name;  
a component for determining if said Web site's Internet domain has been registered;  
and a component for returning an image to the browser for display containing registration data from the registration server associated with the domain name, together with date-and-time information and code that prevents the dynamic icon from being copied." see paragraphs [0003], [0018], [0021], [0022], [0024], [0029], [0031], [0032]; and figures 2, 5 and 6.
